

NF 20 APL HEAVY DUTY POWERED PALLET TRUCK

NF20 APL is a ruggedly designed powered pallet truck with a heavy duty 2,000 kgs capacity (up to 215 mm lift height)

With electronic control as a standard feature, the drive motor takes only the power necessary for the task without wasting battery capacity.

A unique suspension on the drive motor uses pressure on mounting springs to ensure that the drive wheel is always in firm contact with the floor. The pallet truck is very well designed with function controls within reach which make it easy to handle and work with.

The pallet truck conforms fully to EU design standards and the high durability of proven components ensures a minimum of maintenance.

Technical data

Optional ride-on platform

Capacity	2000 kg (at 600 mm centre)
Drive speed:	3.6 km/h laden 5.0 km/h unladen
Turning radius:	1660 mm
Width over forks:	560mm
Length of forks:	1150mm
Raised Forks Height	215 mm
Lowered Forks Height:	90 mm
Battery:	24 Volt / 240Ah
Drive motor:	24V/800W
Lift motor:	24V/1000W
Maximum incline:	7% unladen 5% laden
Aisle width:	2300 mm (at a loading length of 1200 mm and a safety limit of 200 mm)
Weight:	410 kg (excl batteries)
Wheels:	Load wheel: Polyurethane Drive wheel: Rubber Balance caster wheels: Polyurethane
Optional:	Drivers platform, special fork sizes, higher capacity
