

Semi-powered Pallet Truck

The LiftMate semi-powered pallet truck is designed to reduce operator effort in pallet handling operations. With an electrically powered drive and manual hydraulic lifting & lowering action, this model is lightweight and cost effective, making it ideal for use in small warehouses and shops or on the back of vehicles.

- High capacity electric motor
- Available in 1000kg & 1500kg models
- 180° steering allows for greater manoeuvrability
- Choice of fork sizes available
- Built in charger
