

Magnetic Pallet Stop

Absorber

Model - IPSA

Description

The Magnetic Pallet Stop Absorber is specifically designed for the safe collection and removal for Goods of varying sizes both at height and at floor level. The Pallet Stop Absorber is a versatile and adjustable piece of equipment to limit protrusion when collecting a smaller sized pallet, reducing fork overhang.

Model	Dimensions (d x h) mm	Weight (kg)	No. of Magnets	Fork Reduction (mm)
