

Quick Hitch Hydraulic Sweeper / Collector

Model – IHSC-1

Description

The **Hydraulic Tele-Sweeper** is a cost-effective addition to the versatility of your telehandler forklift. By simply attaching via the Qfit and connecting to the Forklift's Hydraulics, it sweeps the most arduous environments in a fraction of the time than conventional methods.

Model	Sweeping Width (mm)	Debris Collector Capacity (m3)	Water Tank Capacity (litres)	Weight (kg)	LLC (mm)
